Lr.No.TSBCL/MIS/2016-17

Dt: 29.11.2016

Circular - 100

Sub: MIS-Breakages-F2 Replacement-Reg.

The attention of the DMs is invited to subject cited above. It is observed that the F2 Breakage replacement procedure is not being followed stringently by all the depots. The DMs are requested to instruct the concerned to individually scan the HEAL of both the broken bottle as well the bottle issued towards replacement. In case any replacement is made by scanning the Brand Bar Code instead of HEAL, the DM should record the reasons there of with suppliers details for each of such replacement and send a weekly report to the Corporate Office failing which the DM will be held responsible. The HEALS of F1 Breakages also should be scanned. In case the Brand Code is scanned instead of HEAL, the reasons there of also should be recorded.

The Managing Director TSBCL desires to review the Breakages exclusively and exhaustively. It is proposed to revise the Breakage analysis size wise to pin point the Brand and size with heavy Breakages.

All the DMs are requested to acknowledge the receipt of this circular.

Yours Truly

General Manager(F&A)
