Lr.No./TSBCL/MIS/2017-18

Dt:24.01.2018

CIRCULAR - 140

All the Chief Managers/Managers are requested to engage the services of an experienced electrician and check the voltage of the Power Supply in the depot.

All the depots are connected with 3 Phase Power Supply, the Depot Managers are requested to get the load uniformly distributed on all the 3 Phases and get the neutral cable properly connected. The Depot Managers are also requested to check the condition of the Earth Pits near the transformer and may get an additional earth pit if required ready for proper earthing.

The Depot Managers are requested to check earthing and neutral in all the switch boards in the depot and get the suitability of the installed cables and wires in the depot assessed for its suitability.

Detail report based on the finding of the electrician may be submitted to the Corporate Office on or before 29th January without fail.
